DATE
October 2026

01

Introduction

Net Marketing is pleased to present this proposal for the design and development of a professional corporate website for Exron Global General Trading LLC.

The website will establish a strong digital presence for Exron Global and clearly communicate the company's capabilities, services, products, regional support, and professional approach to potential clients and partners.

The website will be developed as a corporate/informational website, not an e-commerce platform.

The overall direction will be professional, modern, corporate, industrial, technical, and internationally oriented, while maintaining a credible and institutional appearance appropriate for Exron Global's target market.

02

Project Objectives

The main objectives of the website are to:

- Present Exron Global professionally online.
- Introduce the company, its capabilities, and its services.
- Build credibility and trust with potential clients and partners.
- Clearly communicate the company's procurement and supply capabilities.
- Present products and supply categories in an organized manner.
- Generate business inquiries and quotation requests.
- Provide an easy way for visitors to contact the company.
- Support RFQ and information-request processes.
- Provide company information and relevant resources.
- Establish a strong corporate identity before the company's official business launch.
- Create a scalable website that can be expanded in the future.

03

Target Audience

The primary target audience includes:

- U.S. Government customers.
- U.S. Government and military-related facilities.
- U.S. bases across North America.
- U.S. Government and military-related customers across the Middle East.
- Customers and organizations across Asia and Europe.
- Procurement departments.
- Contractors and business partners.
- Organizations requiring regional procurement, logistics, supplies, and project support.

The website will therefore emphasize professionalism, reliability, capabilities, responsiveness, and international reach.

04

Proposed Website Structure

Based on the information provided by Exron Global, Net Marketing recommends the following website structure:

Page	Purpose
1. Home	A strong introduction to Exron Global, key capabilities, services, industries, geographic reach, and calls to action.
2. About Us	Company introduction, mission, values, approach, and overall business profile.
3. Capabilities	A detailed presentation of the company's major procurement, supply, logistics, and project-support capabilities.
4. Products & Supply	Organized categories covering the types of products and equipment Exron Global can source and supply.
5. Services	Procurement, logistics, project support, construction/refurbishment, facility support, manpower, and related services.
6. Industries / Sectors	The sectors and operational environments that Exron Global is positioned to support.
7. Projects & Support	A professional presentation of Exron Global's project-support approach without creating or claiming projects that have not yet been officially provided.
8. Resources / Certifications	A dedicated area for approved company documents, certifications, downloadable materials, and other official resources when available.
9. Contact Us	Contact information, inquiry form, RFQ functionality, location, email, telephone, and WhatsApp communication.

This structure is proposed as the initial professional architecture and can be adjusted according to management feedback. The project fee covers these 9 pages; additional pages are quoted separately (see Section 32).

05

Home Page

The Home page will serve as the primary introduction to Exron Global. It may include:

- Professional hero section.
- Company introduction.
- Key capabilities.
- Products and supply categories.
- Services overview.
- Industries/sectors.
- Geographic coverage.
- Why Exron Global.
- Professional imagery.
- Request a Quote call-to-action.
- Contact call-to-action.

The Home page will be designed to allow visitors to understand the company and its capabilities quickly.

06

About Us

The About Us section will communicate:

- Company overview.
- Business approach.
- Mission.
- Values.
- Professional standards.
- Regional operating approach.
- Commitment to customers and partners.

All information will be based on official information provided or approved by Exron Global.

07

Capabilities

The Capabilities section will present Exron Global's core areas of operation. The proposed categories include:

- Procurement and Supply.
- Building Materials and Consumables.
- Electrical and Power Equipment.
- IT and Communications.
- Tools and Industrial Supplies.
- Furniture and Accommodation.
- HVAC and Facility Requirements.
- Vehicles and Heavy Equipment.
- Skilled and Non-Skilled Manpower.
- Construction and Refurbishment.
- Project Materials and Regional Logistics.

The presentation will focus on clarity rather than creating an unnecessarily large product catalog.

08

Products & Supply

The Products & Supply section will organize the company's supply capabilities into clear categories. Potential categories include:

- Construction materials.
- Electrical equipment.
- Power equipment.
- Industrial tools.
- IT and communication equipment.
- Furniture and accommodation supplies.
- HVAC and facility equipment.
- Vehicles and heavy equipment.
- Consumables.
- Project materials.
- Other approved procurement categories.

Specific products will only be listed when supported by information or materials provided by Exron Global.

09

Services

The Services section will present the company's service capabilities, including:

- Procurement services.
- Regional sourcing.
- Logistics and delivery.
- Project support.
- Construction and refurbishment support.
- Facility support.
- Manpower support.
- Supply coordination.
- Material sourcing and delivery.

The presentation will emphasize Exron Global's ability to support demanding operational requirements across the region.

10

Industries / Sectors

The website may organize Exron Global's services according to the environments and sectors it supports. Potential sectors include:

- Government and defense support.
- Facilities and operations.
- Construction and infrastructure.
- Logistics and supply.
- Commercial and institutional requirements.

The final wording will be based on the company's approved positioning.

11

Projects & Support

The Projects & Support section will demonstrate the company's project-support approach.

> Because Exron Global has specifically indicated that unsupported information must not be invented, the website will **not** create fictional projects, clients, contracts, government approvals, certifications, or achievements.

Until official project information is available, this section can focus on:

- Project-support capabilities.
- Procurement coordination.
- Supply-chain support.
- Regional logistics.
- Material sourcing.
- Delivery coordination.
- Construction/refurbishment support.
- Operational support.

Approved projects and case studies can be added later.

12

Resources / Certifications

This section may contain:

- Company documents.
- Approved certifications.
- Official brochures.
- Capability statements.
- Product documents.
- Downloadable resources.
- Other approved company materials.

> No certification, approval, registration, government affiliation, or credential will be displayed unless officially provided by Exron Global.

13

Request for Quote (RFQ) System

A prominent Request a Quote function will be included throughout the website. The RFQ form may request:

- Name.
- Company.
- Position.
- Email.
- Phone number.
- Country.
- Requirement category.
- Product or service required.
- Quantity.
- Delivery location.
- Required delivery date.
- Requirement description.
- File/attachment upload.

The objective is to make it simple for potential customers to submit professional requirements directly to Exron Global.

14

Website Functionality

The proposed website functionality includes:

- Contact form.
- General inquiry form.
- RFQ form.
- File upload capability.
- Click-to-call functionality.
- Email links.
- WhatsApp communication.
- Google Maps/location integration.
- Downloadable documents.
- Image galleries where appropriate.
- Video integration where required.
- Spam protection.
- Form confirmation messages.
- Basic website analytics.
- Secure HTTPS connection.

Additional functionality can be considered if required by management.

15

Website Design Direction

The visual direction will be:

Professional • Modern • Corporate • Industrial • Technical • Institutional • International

The design should communicate:

- Reliability.
- Capability.
- Professionalism.
- Strategic thinking.
- Operational readiness.
- International business standards.

The website should feel distinctive and professional rather than being a direct copy of competitor websites.

The design will avoid excessive or overly aggressive military imagery and instead use appropriate industrial, logistics, engineering, infrastructure, procurement, and operational visuals.

16

Color Direction

Based on Exron Global's questionnaire, the primary color direction will be inspired by the American flag:

Deep Navy	Professional Blue	Controlled Red	White	Off-white	Charcoal / Slate

The final palette will be balanced carefully so that the website remains professional and corporate rather than overly colorful.

17

Typography

Since Exron Global does not currently have a specified font system, Net Marketing recommends a modern professional typeface.

Role	Typeface
Primary recommendation	Inter
Alternative	Montserrat

The final typography system will include consistent font sizes and hierarchy for:

- Main headings.
- Section headings.
- Subheadings.
- Body text.
- Buttons.
- Navigation.
- Forms.

18

Visual Content

Since Exron Global currently does not have a complete library of professional photographs or visual materials, Net Marketing can assist with selecting suitable professional imagery. Potential imagery may include:

- Logistics.
- Warehouses.
- Industrial equipment.
- Construction.
- Engineering.
- Procurement.
- Transportation.
- Heavy equipment.
- Electrical systems.
- IT and communications.
- Facilities.
- Professional personnel.

Images will be selected to support the company's corporate identity and should not misrepresent actual company projects or operations.

19

Branding & Logo

Exron Global will provide its official logo. Net Marketing will assist with preparing the logo for high-quality website use where necessary.

The website will maintain consistency in:

- Logo usage.
- Colors.
- Typography.
- Buttons.
- Icons.
- Images.
- Layout.
- Overall visual identity.

If additional branding requirements arise, they can be discussed separately.

20

Content Development

Exron Global will provide the website copy (the written text for each page). Net Marketing will place and format this content within the website design.

Exron Global will provide

- Website copy (text for each page).
- Official company information.
- Accurate business descriptions.
- Official capabilities.
- Company documents.
- Logo.
- Contact information.
- Certifications or approvals, if applicable.
- Approved company facts.
- Any existing official materials.

Net Marketing will provide

- Website content structure.
- Page organization.
- Content formatting.
- Website presentation.

Optional Copywriting Service

If Exron Global prefers, Net Marketing can write the website copy, including page text, headlines, and calls to action, based on official information provided by the company. This service is optional and is provided only at Exron Global's request.

> Copywriting is **not included** in the USD 350 project fee. If requested, it will be quoted separately and charged in addition to the project fee.

All final company information will be subject to client approval.

21

Content Accuracy & Approval

Accuracy is a key requirement for the project. Net Marketing will not invent:

- Government contracts.
- Military contracts.
- Certifications.
- Clients.
- Partners.
- Government approvals.
- Projects.
- Company achievements.
- Affiliations.
- Credentials.

> Any information displayed on the website will be based on information provided or approved by Exron Global.

22

Domain & Hosting

Exron Global already owns the domain **www.exronglobal.com**, registered through GoDaddy. At the time of the questionnaire, hosting had not yet been established.

Net Marketing can assist with:

- Selecting appropriate hosting.
- Purchasing/arranging hosting.
- Hosting configuration.
- Domain/DNS configuration.
- SSL setup.
- Website deployment.
- Staging environment.
- Launch configuration.

Hosting Costs

Hosting is not included in the USD 350 project fee. If Exron Global asks Net Marketing to arrange hosting, Net Marketing will recommend a suitable provider based on the website's requirements, performance, security, expected traffic, storage, and budget. The cost will be charged at the provider's current price, as explained in Section 33.

23

Company Email

Exron Global already has **info@exronglobal.com**, which is managed by the company's administration department.

Net Marketing will coordinate the website email/form configuration with the existing email setup where required. Before launch, the email delivery and receiving process will be tested.

24

Security

The website will be configured with appropriate basic security measures, including:

- HTTPS/SSL.
- Secure hosting configuration.
- Spam protection.
- Secure forms.
- Regular updates where applicable.
- Backups where supported by the hosting environment.
- Controlled administrative access.
- Strong administrator credentials.

Additional security requirements can be discussed if required.

25

Mobile & Responsive Design

The website will be responsive and designed to work across:

- Desktop computers.
- Laptops.
- Tablets.
- Mobile phones.

The layout, navigation, images, forms, buttons, and text will be optimized for different screen sizes.

26

Website Header & Navigation

The proposed primary navigation is:

Home | About | Capabilities | Products & Supply | Services | Industries | Projects | Resources | Contact	**Request a Quote**

A prominent Request a Quote button will also be included. The final navigation may be adjusted during development to ensure the best user experience.

27

Website Footer

The footer may include:

- Company introduction.
- Main navigation.
- Contact information.
- Email.
- Phone.
- WhatsApp.
- Location.
- Request a Quote link.
- Privacy Policy.
- Terms/other required legal pages.

> Net Marketing will provide standard template Privacy Policy and Terms of Use pages. Because the website collects personal information and file uploads through its forms, Exron Global is responsible for reviewing and approving these pages, ideally with its legal advisor, before launch.

28

Project Process

The project will follow a structured development process.

Stage	Description
1 — Discovery & Planning	Review company information, requirements, content, branding, structure, and functionality.
2 — Design Direction	Develop the initial visual direction, color system, typography, layout, and homepage concept.
3 — Website Development	Build the core website structure and implement the approved design.

Stage	Description
4 — Content & Functionality	Add approved content, imagery, forms, RFQ functionality, contact options, and required integrations.
5 — Testing	Desktop, mobile, navigation, forms, links, responsiveness, email delivery, RFQ process, basic security, and general usability.
6 — Review & Launch	Provide the completed version for management review, apply final approved corrections, and prepare the website for launch.

29

Proposed Timeline

The target delivery period is **approximately 2 weeks**.

Days	Activities
Days 1–2	Discovery, planning, design direction.
Days 3–5	Homepage and core website development.
Days 6–8	Remaining pages and content structure.
Days 9–10	Content, forms, RFQ functionality, integrations.
Days 11–12	Testing, responsiveness, corrections.
Days 13–14	Management review, final corrections, and launch preparation.

> The two-week target depends on timely delivery of required content, materials, approvals, and feedback from the client. Major scope changes or delays in receiving required materials may affect the timeline.

30

Management Review & Approval

Exron Global has indicated that higher management will be responsible for approval. The review process will include:

- 1. Design direction review.
- 2. Homepage review.
- 3. Website structure review.
- 4. Complete first-version review.
- 5. Final corrections.
- 6. Final approval.
- 7. Launch.

> The project fee includes **up to two rounds of revisions** at each review stage. Additional revision rounds, or changes to items already approved, may be quoted separately.

Regular updates will be provided during development.

31

Official Business Launch

According to the information provided by Exron Global, the official business launch is planned for:

November 11, 2026

The website development schedule will therefore be planned to support preparation for this launch date, subject to timely content delivery and management approvals.

32

Quotation & Payment Terms

PROJECT FEE

USD 350

70% Advance Payment
Required to begin the project.

30% Final Payment
Due upon completion of the project and before final handover/launch.

The project fee is a fixed price covering the **9 pages** listed in Section 4, together with the services, functionality, and deliverables described in this proposal. Payments can be made by bank transfer or another method agreed in writing.

Scope & Additional Services

Any additional page beyond the 9 pages listed in Section 4 will increase the project fee and will be quoted separately. The same applies to any other item outside the agreed scope, including any additional:

- Page.
- Copywriting.
- Feature.
- Integration.
- Service.
- Custom functionality.
- Third-party service.
- Major scope change.

Additional work will only proceed after discussion and approval. Major changes to the approved scope may also affect the project timeline.

Handover & Ownership

Once the final payment is received, Net Marketing will hand over full administrator access, website files, and login credentials. Exron Global will own the website and its content. Third-party items such as hosting, paid tools, and stock images remain subject to their providers' license terms.

Proposal Validity

This proposal is valid for 14 days from its date of issue (October 2026). After this period, pricing and timeline may need to be confirmed again.

33

Hosting & Third-Party Costs

The project fee does not include third-party costs. These may include:

- Website hosting.
- Hosting renewal.
- Domain-related charges.
- Premium tools or software licenses.
- Premium design assets, if required.
- Paid third-party services.
- External integrations.
- Other provider charges.

> If any such service is required, the applicable cost will be communicated to Exron Global for approval before purchase or activation.

34

Post-Launch Support

Exron Global has indicated that it expects the developer to provide initial support as part of the agreement. Net Marketing will provide **30 days of post-launch support**, starting from the launch date. This includes:

- Initial technical assistance.
- Website corrections.
- Basic troubleshooting.
- Launch-related support.
- Assistance with website operation.

Support covers corrections and assistance related to the delivered scope. New features, new pages, or content changes beyond the agreed scope are not included.

After the 30-day period, ongoing maintenance and future updates can be provided under a separate monthly or per-request arrangement.

35

Future Expansion

The website will be developed with future expansion in mind. Possible future additions may include:

- Additional service pages.
- Additional product categories.
- Project case studies.
- Company news.
- Download center.
- Additional languages.
- Advanced inquiry systems.
- Additional integrations.
- More detailed resource sections.

Future additions can be quoted separately if they fall outside the initial project scope.

36

Project Deliverables

Upon completion, the project will include the agreed website implementation consisting of:

- Professional corporate website.
- Responsive design.
- Proposed website structure.
- Approved pages and content.
- Capabilities section.
- Products & Supply section.
- Services section.
- Industries/Sectors section.
- Projects & Support section.
- Resources section.
- Contact section.
- RFQ functionality.
- Contact/inquiry forms.
- WhatsApp integration.
- Click-to-call functionality.
- Google Maps/location integration.
- Basic security configuration.
- Responsive mobile presentation.
- Privacy Policy and Terms of Use pages (template).
- Website testing.
- Launch preparation.
- Administrator access and handover.

37

Client Responsibilities

To maintain the agreed timeline, Exron Global will be responsible for providing:

- Website copy (unless copywriting is requested).
- Accurate company information.
- Logo.
- Official documents.
- Certifications, where applicable.
- Approved contact information.
- Required company materials.
- Required product/service information.
- Required images or approval for suitable stock imagery.
- Timely feedback.
- Timely management approvals.

Delays in receiving required information or approvals may affect the delivery schedule.

38

Scope Control

The website will be developed according to the agreed scope. Requests that significantly change the original requirements may require:

- Additional quotation.
- Additional development time.
- Additional third-party costs.

Net Marketing will communicate any such changes before additional work is undertaken.

39

Project Success Criteria

The project will be considered successful when the website:

- Presents Exron Global professionally.
- Clearly communicates the company's capabilities.
- Establishes credibility and trust.
- Provides an easy way to request information or quotations.
- Works effectively on mobile and desktop.
- Provides clear navigation.
- Uses accurate company information.
- Provides appropriate contact options.
- Is technically prepared for launch.
- Supports the company's planned November 11, 2026 business launch.

40

Final Creative Direction

The final website should communicate the following qualities:

Professional
A strong corporate appearance suitable for government, institutional, and international business audiences.

Modern
Clean layouts, modern typography, strong visual hierarchy, and contemporary web standards.

Capable
Clear presentation of procurement, supply, logistics, and project-support capabilities.

Reliable
A trustworthy visual identity supported by accurate information and professional presentation.

International
A design appropriate for customers and partners across North America, the Middle East, Asia, and Europe.

Distinctive
A unique design direction developed specifically for Exron Global rather than copied from competitors.

41

Next Steps

Upon approval of this proposal:

Step	Action
1	Confirm the project.
2	Receive the 70% advance payment (USD 245).
3	Collect final company materials.
4	Confirm hosting requirements.
5	Confirm the final design direction.
6	Begin website development.
7	Provide progress updates.

Step	Action
8	Submit the first complete version for management review.
9	Apply approved corrections.
10	Complete final testing.
11	Receive the 30% final payment (USD 105).
12	Prepare the website for launch.

42

Client Approval

By approving this proposal, Exron Global General Trading LLC confirms its agreement to proceed with the website design and development project according to the scope, payment terms, timeline, and conditions outlined above.
